(TR-103) PROMPT ENGINEERING –
Training Day 16 Report:

SmartMap AI Project

Tasks Completed:

- Finalized the project idea and scope: SmartMap AI will allow users to login/signup, search places on a map using text or voice, save favorite places, view history, and interact with a travel assistant chatbot.
- Designed the frontend layout for login and signup pages using a modern glassmorphism style. Made it responsive for desktop and mobile screens.
- Selected Poppins font for clean typography and applied a colorful gradient background for visual appeal.
- Integrated AdminLTE, FontAwesome, and SweetAlert for styling, icons, and interactive alerts.
- Created login and signup cards with input fields and buttons including hover effects.
- Added a header with the project title and logo icon, and a footer with copyright information.
